

## Oven & Grill Cleaner -Gel

### TECHNICAL DATA SHEET

**CODE: GUTO**

**Safeblend Oven & Grill Cleaner Gel** is formulated to quickly and safely clean hot plates, fryers, commercial ovens, grills and BBQs with or without Teflon coatings. It easily removes burnt on grease and carbon using an advanced non-corrosive technology.

**DIRECTIONS FOR USE:** For best results, dilute using the recommended dilutions.

**Hot plates, Grills & BBQs:** Pre-heat surface to 80°C (180°F). Using 1:1 or 500 ml per litre, apply cleaner liberally to surface. Let stand for 30-60 seconds to allow maximum penetration. Occasional use of a scrubbing pad will speed up cleaning. Wipe clean using a clean damp cloth, brush or scouring sponge. Rinse with potable water. Wipe dry. Apply a thin coat of cooking oil to prevent rusting. **Commercial Ovens:** Spray product undiluted to all surfaces to be cleaned. Let stand: the longer the wait period, the less scrubbing required. Scrub with scouring sponge or nylon scrubbing pad. Rinse with potable water. Wipe dry.

**Deep Fryers:** Drain and wipe, removing all excess grease. Fill-up with water, to 10 cm from top. Using 1:40 to 1:20 or 25 to 50 ml per litre, add Safeblend Oven & Grill Cleaner. Bring to boil and let soak for 30 minutes. Drain and rinse with water. Scrub and rinse as required while still hot. Rinse with potable water. Wipe dry.

**NOTE:** Avoid contamination of food during use. All surfaces subject to direct food contact must be thoroughly rinsed with potable water before reuse.

**Storage:** Keep in a tightly sealed container in a well ventilated room. Do not store with food products. Keep from freezing.

| PHYSICAL PROPERTIES   | GHS Class: Skin Corrosion/Irritation — category 1;<br>Serious eye damage/eye irritation — category 1;<br>Corrosive to metals — category 1                |
